## UAE Indices

## UAE Market Commentary

- UAE equity markets closed lower yesterday, weighed down by losses in real estate & financial sector stocks.
- Financial sector stocks, SHUAA Capital and GFH FINANCIAL GROUP declined 8.6% and 7.7%, respectively. Real estate sector stocks, Eshraq Properties Co and Aldar Properties fell 7.5% and 2.4%, respectively. Peers, Deyaar Development and Union Properties dropped 3.6% and 3.4%, respectively. Bucking the trend, shares of UNB perked up 3.1% as traders persisted in speculation that the bank may be acquired by ADCB, up 3.4%.
- Elsewhere, existing home sales in the US unexpectedly climbed 2.00%, on a monthly basis, to a level of 5.60 million in October, compared to a revised level of 5.49 million in September.
- The Abu Dhabi Securities Exchange (ADX) general index ended 0.26% lower at 4,218.72, while the Dubai Financial Market index closed 0.47% lower at 3,290.76.

## SHUAA Capital

- Following a daily upper Bollinger band crossover on Sunday, the stock retreated in the last session and finished at AED1.60, after making a low at AED1.58.
- On the weekly chart, the MACD and RSI are trading with a strong bias, reflecting at a bullish technical picture. However, the daily RSI and stochastic indicators are showing loss of upward potential, suggesting at possible bearish momentum in the coming session.
- Immediate support is located at the psychological AED1.50 level, followed by the AED1.43/1.40 and 20day SMA (currently trading at AED1.28) levels. A move back below the latter might trigger further bearish pressure on the stock.
- On the other hand, intraday resistance is placed at the daily upper Bollinger band (currently trading at AED1.66) and AED1.78 /1.82 zone. A break above the latter might lead to strength in the stock.

## Gulf Finance House

- The stock traded with a bearish tone in the previous session and ended at AED1.80, after touching a low at AED1.76.
- Although the weekly MACD is heading higher, the RSI and stochastic oscillators are moving downwards, reflecting at a bearish technical outlook. On the daily chart as well, the RSI and stochastic are trading with a weak bias, further validating above view.
- Key support to be watched is situated at the AED1.72/1.70 level, followed by the next ones at the AED1.64/1.60 and AED1.54 levels. A clear breach below the latter might lead to increased selling pressure on the stock.
- On the contrary, key technical barrier is placed at the AED1.85 level, followed by the daily upper Bollinger band (currently placed at AED1.96) and AED1.99 levels. A sustained break above the latter might generate bullish momentum in the stock.

## Deyaar Development

- The stock formed a long bearish candlestick pattern on the daily chart yesterday and settled at AED0.530.
- On the daily chart, the MACD is trading in the negative territory along with the RSI and stochastic trading with a bearish tone, hints at negative momentum in the near term. Similarly, the weekly momentum oscillators are tranquil below their centrelines, further endorsing the above stance.
- Immediate support is positioned at the AED0.521 level, followed by the daily lower Bollinger band (currently trading at AED0.510) and AED0.501 levels. A move back below the latter might lead to further downside momentum in the stock.
- On the flipside, intraday resistance is placed at the daily upper Bollinger band (currently trading at AED0.540), followed by the 50day SMA (currently trading at AED0.550) and AED0.558/0.560 levels. A surge above the latter might trigger positivity in the stock.

## Gulf Navigation Holdings

- The stock traded in the red in the prior session and closed at AED1.53, after making a low at AED1.51.
- Although the daily MACD is trading with a bullish tone, the RSI and stochastic indicators are heading south, reflecting at a negative technical scenario. Likewise, the weekly chart is showing signs of negativity as the RSI and stochastic are trading with a slight weak bias, further supporting the above stance.
- Crucial technical support resides at the AED1.48 and AED1.41 levels, a breach below the latter might lead to further negative momentum in the stock, paving way for the AED1.38 and 20day SMA (currently placed at AED1.32) levels as the next possible supports.
- On the positive side, immediate resistance is placed at the AED1.58 level, followed by the daily upper Bollinger band (currently trading at AED1.62) and AED1.66 levels.

## Dubai Investments

- The stock traded firmer for the second straight session yesterday and yet again finished above the daily upper Bollinger band (currently placed at AED2.11) at AED2.13, after hitting a high at AED2.15.
- A signal line crossover by the weekly MACD from below along with the RSI and stochastic pointing north, indicates at strength in the coming week. On the daily chart, the MACD and RSI are trading with a bullish showing, further confirming the bullish view.
- Important intraday resistance is seen at the AED2.15 level, followed by the AED2.17 and AED2.21 levels. A surge above the latter might trigger further upside momentum in the stock.
- However, a daily upper Bollinger band crossover indicates at potential correction in the stock. Key support is placed at the AED2.09 level, followed by the 200day SMA (currently trading at AED2.06) and 50day SMA (currently trading at AED2.04) levels.

## Ajman bank

- The stock traded with a positive tone in the last session and closed at AED1.33, following a high at AED1.34.
- Although the daily MACD is tranquil below its centreline, the RSI and stochastic are attempting to move out of their oversold regions, suggesting at probable upside momentum in the short term. Furthermore, the weekly stochastic and RSI oscillators are trading with a slight positive tone, further affirming the above stance.
- Key near term resistance is situated at the AED1.36 level, followed by the 20day SMA (currently placed at AED1.40) and AED1.43 levels. A clear break and stability above the latter might lead to further positive momentum in the stock.
- On the contrary, key support is placed at the AED1.31 and the daily lower Bollinger band (currently placed at AED1.29) levels. A breach below the latter might generate negativity in the stock.
