Deyaar Development

- Following the formation of a bearish harami cross candlestick pattern on the daily chart on 6 April, the stock extended its downtrend in the prior session and ended at AED0.571, after touching a low at AED0.570.
- As of now, the daily MACD is trading below its midline coupled with the RSI and stochastic heading south indicates at a bearish technical picture. On the weekly chart as well, the MACD and RSI indicators are trading with a negative tone, further endorsing the above stance.
- Important support is situated at the AED0.565 level, followed by the AED0.556 and the daily lower Bollinger band (currently trading at AED0.550) levels. A breach below the latter might trigger further acceleration to the downside.
- Meanwhile, key resistance is placed at the AED0.580 level, followed by the 50day SMA (currently trading at AED0.590) and AED0.600 levels.

Takaful House

- The stock traded lower for the second successive session yesterday and finished at AED1.38, following a low at AED1.37.
- Although the weekly RSI is pointing south, the MACD and stochastic indicators are heading upwards, hinting at the presence of bullish momentum. However, the daily RSI and stochastic oscillators are showing loss of upward potential, reflecting at a possible correction in the coming session.
- Key support is located at the AED1.33 and AED1.30 levels. A move back below the latter might lead to further negative momentum in the stock, clearing way for the AED1.28 and AED1.25 levels as the next possible supports.
- On the upside, immediate resistance is placed at the daily upper Bollinger band (currently trading at AED1.40), followed by the AED1.44 and AED1.48 levels. A sustained break above the latter might trigger positivity in the stock.

Methaq Takaful Insurance

- After forming a shooting star candlestick pattern on the daily chart on Sunday, the stock traded in the red for the second straight session yesterday to close at AED0.84.
- On the daily chart, the RSI and stochastic oscillators are showing loss of upward potential, reflecting at the presence of negative momentum in the near term. Similarly, the weekly MACD and RSI are placed below their midlines, further confirming the above view.
- Key support is placed at the 20day SMA (currently placed at AED0.83), followed by the AED0.81 and AED0.80 levels. A move back below the latter might lead to further bearish pressure on the stock.
- On the other hand, key intraday resistance is positioned at the AED0.85 level, followed by the daily upper Bollinger band (currently trading at the AED0.86) and 200day SMA (currently placed at AED0.87).

Abu Dhabi Islamic Bank

- Yesterday, the stock formed a long bearish candlestick pattern on the daily chart and settled below the 50day SMA (currently placed at AED3.89) at AED3.87, following a low at AED3.86.
- With a possible signal line crossover by the daily MACD from above along with the RSI and stochastic sharply heading south, the near-term technical outlook appears to be bearish. On the weekly chart, the momentum oscillators are trading with a negative showing, further affirming the above stance.
- The daily lower Bollinger band (currently trading at AED3.84) is acting as an intraday support, followed by the 100day SMA (currently placed at AED3.81) and AED3.77 levels. A breach below the latter might lead to further weakness in the stock.
- On the contrary, key resistance is placed at the 20day SMA (currently trading at AED3.90), followed by the AED3.92 and AED3.95 levels.

Dubai Financial Market

- The stock traded with a bearish tone in the prior session and ended at AED1.25.
- A possible centreline crossover by the weekly MACD to trade into the negative zone conjoined with the RSI and stochastic oscillators tranquil below their midlines hints at a weak technical scenario. On the daily chart, the momentum oscillators are trading with a bearish bias, further supporting the above stance.
- Key technical support is situated at the AED1.23 level, followed by the daily lower Bollinger band (currently placed at AED1.22) and AED1.21 levels. A breach below the latter might lead to further bearish momentum in the stock.
- Meanwhile, the key technical barrier is placed at the AED1.27 level, followed by the 20day SMA (currently trading at AED1.28) and AED1.29 levels. A surge above the latter might trigger strength in the stock.

GFH Financial Group

- The stock has been trading sideways since past couple of sessions. Yesterday, the stock posted marginal losses to end at AED2.49, after making a low at AED2.47.
- On the weekly chart, the MACD and stochastic indicators are moving downwards, reflecting at a negative technical picture. However, the daily momentum oscillators are trading with a mixed showing, suggesting at possible consolidation in the coming session.
- Key support to be watched is aligned at the AED2.47 level, followed by the AED2.44 and AED2.42 levels. A breach below the latter might lead to downside momentum in the stock.
- On the bright side, key intraday resistance is placed at the AED2.52 level, followed by the AED2.55 and the 20day SMA (currently trading at AED2.58) levels. A break and stability above the latter might trigger upside momentum in the stock.
